

ROCK ON learning objectives for the Geology Science Resources

1. To learn about the 3 main rock groups

- Igneous
- Sedimentary
- Metamorphic

To be able to understand how these rocks are formed.

2. To encounter these rock groups in use in the historical buildings at the museum.

3. To find and identify the following rock types whilst following the Rock Trail;

Chalk	Flint
Clay	Limestone
Slate	Sandstone
Granite	

4. To make first hand observations of these rocks and learn how they are used in the different buildings on the trail.

5. To understand that buildings were made from local rocks and therefore reflect the local Geology.

6. To spark an interest in Geology and how it relates to our lives through the buildings around us.
